CAREER OBJECTIVE

Detail-oriented Computer Science student and Data Engineering Trainee with hands-on experience in Python, SQL, relational database design, ETL concepts, and front-end web development. Interested in building reliable data solutions and practical software applications while continuing to strengthen data engineering and software development skills.

EDUCATION

Bachelor of Science in Computer Science (B.Sc.) | **Mansoura University** **Expected June 2028**

Faculty of Computers and Information

- Academic Standing: Excellent Grade (Top-tier performance)

INTERNSHIPS & TRAINING

Data Engineering Trainee | *Digital Egypt Pioneers Initiative (DEPI)* **Jul 2026 – Present**

Ministry of Communications and Information Technology

- Participating in intensive practical training focused on Data Engineering concepts, Python scripting, and SQL databases.
- Learning and practicing basic ETL pipeline workflows, data transformation techniques, and schema optimization.
- Collaborating on practical labs to design relational database schemas and write optimized SQL queries.

Front-End Web Development Trainee **2025 – 2026**

Faculty of Science, Mansoura University

- Completed hands-on technical training focused on modern web design, responsive layouts, and clean UI standards.
- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and modern front-end practices.

PROJECTS

Interactive Restaurant Front-End Web Application **Mansoura University**

University Coursework Project | *Technologies: HTML5, CSS3, JavaScript* | Project Link

- Developed a multi-interface front-end application for a restaurant, featuring custom navigation menus, food categories, and item showcases.
- Implemented interactive client-side ordering functionality allowing users to select menu items, view order details, and place orders.
- Ensured a smooth user experience across different screen sizes with clean CSS layouts and dynamic JavaScript DOM manipulations.

E-Commerce Web Application & Order Processing System (Adidas Store Concept) **Mansoura University**

University Coursework Project | *Technologies: HTML5, CSS3, JavaScript, PHP, XAMPP* | Project Link

- Built dynamic client interfaces featuring shopping cart interactions and form validations for an academic project.
- Integrated PHP scripts with local MySQL/XAMPP databases to handle HTTP requests and order submission workflows.

Hospital & Enterprise Database Management System (RDBMS) **Mansoura University**

University Coursework Project | *Technologies: SQL, ERD Modeling, Relational Schema Mapping*

- Designed Entity-Relationship Diagrams (ERD) and relational schemas for hospital database management as part of coursework.
- Wrote DDL/DML SQL scripts, multi-table joins, and integrity constraints across relational tables to maintain data consistency.
- Applied database normalization (1NF to 3NF) to minimize data redundancy and structure efficient queries.

TECHNICAL SKILLS

Programming Languages:	Python, SQL, C++, C#, JavaScript, PHP, HTML5, CSS3
Data & Databases:	Data Engineering Fundamentals, ETL Workflow Concepts, RDBMS Design, ERD Modeling, SQL Queries
Tools & Technologies:	Git, GitHub, XAMPP, Pandas, Seaborn, Matplotlib, Plotly
Languages:	Arabic (Native), English (Fluent), French (Conversational)
